

Quality Inspector II Job Posting

For over 35 years, J. Sterling has produced parts, sub-assemblies and finished goods for its Fortune 500 OEM customers.

Sterling is built around our quality culture and our team of Quality Engineers and Quality Inspectors are involved at every step throughout the manufacturing life-cycle. We strive for 100% quality, 100% on time and 100% complete customer orders.

As a result of our continued growth, we are looking for an experienced Quality Inspector to help us get to the next level.

Our Quality Inspectors are responsible for the maintenance of the quality standards by approving incoming materials, performing in-process and final inspections and recording results. They work daily to improve inspection effectiveness and efficiency and ensure all measuring instruments and fixtures are properly calibrated. They work together to train production staff on quality systems, gages and inspection methods.

The ideal candidate will have at least 5 years of experience in a precision machining related quality role in an ISO 9001 environment (ISO 13485 a plus) . Additionally, the person must have an outstanding understanding of technical drawings and specifications with the ability to determine appropriate metrology including the capability of implementing new technology. Advanced experience using CMMs and performing calibration of equipment are a must. If you have analytical thinking and mechanical aptitude, including a hands on working knowledge of SPC and its use in continuous improvement you will thrive in this role. Our team members utilize excellent communication skills with the ability to learn quickly and adapt to a changing environment and you will add your capabilities to the team.

If this role matches your experience, capabilities and desire for growth please submit your resume with a cover letter in confidence to;
